Before You Teach Online

If you are considering a course for online delivery, about to teach a course, or wanting to understand the necessary skills and steps required in order to teach, consider some of the content included in this unit.

Before Class Starts

Teaching an online course requires much preparation before the class enters the cyberspace. An instructor must design the course structure, write/prepare activities, assessments, and be sure all content follows all accessibility guidelines.

Disability Access Guidelines

The federal law stipulates that all online material must follow specific accessibility design principles for online content are included in this unit.

Class Management

Effective communication with your online students is foundational to teaching. Structure a course to maximize student ease of access. engage students
