Course Title	Description	Author(s)
Managing Hazardous Waste in California	Hazardous waste was once allowed to run off into soil and water sources or buried in landfills, resulting in contaminated groundwater, polluted habitats for fish and wildlife, and health issues for humans. Fortunately, regulations have been put into place to prevent further environmental contamination. This course is designed to familiarize California employees with regulations tied to the identification, classification, storage and disposal of hazardous waste.	Keenan & Associates Keenan & Associates is the largest privately held insurance brokerage/consulting firm in California. Keenan's innovative solutions provide high quality, cost-effective insurance, employee benefits, and financial services. Keenan specializes in proprietary programs for public agencies and health care organizations.
