Today no official motions or voting or approvals or adjournment took place. Instead ISC members were provided with a presentation on lecture capture technology by Scott Dawe from Echo360.

Scott demonstrated the use of Personal Capture, one of 6 lecture capture options currently offered by Echo360. He showed how the use and features of the product look from a student's point of view and then again how use and features of the same product look from the point of view of an instructor.

The presentation ran from 9:30AM to 11:00AM.
