Expanded Course Outline for COM ST 20 - Agitational and Protest Communication

Course Cover	
Discipline	COM ST-COMMUNICATION STUDIES
Course Number	20
Full Course Title	Agitational and Protest Communication
Catalog Course Description	This class explores the role of agitational and protest communication in the formation, processes, and goals of different historical and contemporary movements. Agitational and protest communication includes the strategies, tactics, and communication utilized by movements to resist or provide different perspectives, including those that have been excluded or silenced. Attention is given to theories, contexts, and strategies related to agitational and protest movements, as well as numerous examples of diverse protest movements in modern and contemporary history.
Rationale	The purpose of this class is to add another option to our Oral Communication list of classes, as well as study the complex and increasingly prevalent processes and communication of agitational and protest movements in the United States and the world. This class is incredibly important given our current political times. Protests in the United States and across the world provides exigency to study the communication tactics and strategies of diverse groups. This course is titled Agitational and Protest Communication to echo similar classes taught across the United States. Our field has studied agitational/protest communication as a subset of Persuasion and Argumentation for a while. This class will be an opportunity for instructors to delve into the research regarding agitational and protest movements.

Course Objectives	
Upon satisfactory completion of the course, students will be able to:	
1. Analyze foundational, contemporary, cultural, and critical agitational and protest communication theories.	
2. Differentiate among the major agitational and protest communication theories and their application to historical and contemporary movements.	
3. Analyze the intercultural aspects of agitational and protest communication theories, including the significance of the interplay between race, class, gender, religion, and other cultural variations.	
4. Demonstrate an understanding of different agitational and protest strategies and tactics.	
5. Evaluate the effectiveness of different agitational and protest strategies and tactics.	
6. Survey case studies to understand the agitational and protest communication strategies used by diverse American cultures and/or international groups, including, but not limited to, the movements of African/African Americans, Latina/o/Latina/o Americans, Asian/Asian Americans, Native Americans, and LGBTQIA communities.	
7. Explore how modern agitational and protest movements have been shaped and will continue to be shaped by a diverse array of cultural influences and traditions.	
8. Collaborate in small groups to analyze the formation, processes, and communication of agitational and protest movements and prepare small group presentations to showcase their application of theory and analysis.	
9. Demonstrate the ability to listen empathically, actively, and critically to agitational and protest messages.

Assignments	
Sample Assignment	
1. In self-directed teams, you will be charged with leading a 30-45 minute discussion of the development and history of an agitation or protest movement prior to the 21 st Century. Specifically, you will be tasked with analyzing the communication strategies	

and tactics used by the movement. The team will produce a well-researched report and deliver a presentation to generate discussion about the history, development, and communication tactics of the movement. Each team member will have the responsibility of completing various tasks (e.g., different writing tasks, generating a discussion, preparing questions for class, creating creative presentations, and applying theories/concepts to the movement). Every person in the team must participate substantially to the overall presentation.

2. Individually, you will apply a theory and several concepts from the text to a film about a(n) agitational and/or protest movement. This is a term paper that will be submitted at the end of the semester; by then, you will be familiar with countless key theories and concepts from the text and articles. The purpose of this assignment is for you to demonstrate the relationships between theory and practice. In addition, this assignment will require a literature review beyond what is available in the text. To complete this term paper:

(a) Select a film (documentary or other) that adequately tells the history and development of a modern agitational and protest movement.

(b) Conduct a literature review that explains the important assumptions and qualities of the theories and concepts. You must include at least five sources from academic journals for this literature review. The literature review should provide a very strong and detailed foundation for the theories and concepts.

(c) Refer to several ways that the theories and concepts help us understand the agitational and protest movement.

3. Understanding and developing the purpose and goals of diverse agitational and protest movements is an important part of this class. Hence, in self-directed groups, the purpose of this assignment is to select a contemporary movement from the 21st Century that focused on the experiences of American cultures and/or international groups, including, but not limited to, the movements of African/African Americans, Latina/o/Latina/o Americans, Asian/Asian Americans, Native Americans, and LGBTQIA communities. Specifically, you will be tasked with analyzing the communication strategies and tactics used by the movement. There are two parts to this group project:

Part I

For Part I, you must work as a team to provide a comprehensive report about the history and communication tactics used by the movement. Members of the group will fulfill the following tasks:

(a) Introduce the movement, its makeup, history, purpose, and mission. This section should provide an introductory thesis statement and preview of the major parts of the report.

(b) Introduce, define and describe the problems faced by the movement.

(c) Identify and describe the multiple causes for the problem.

(d) Identify and describe the multiple effects for the problem.

(e) Apply a concept or theory from the text that may help explain the development of the movement and their identified problem.

Part II

The purpose of Part II is to identify the tactics and strategies used by the movement. Importantly, the group will evaluate the effectiveness of the tactics and strategies given the movement’s desired goals or outcomes. Members will be assigned the following tasks for Part II:

(a) Provide a description of the tactics and strategies.

(b) Present a list with the intended goals/outcomes of the solution.

(c) Explain if the solution was/is effective.

(d) Explain limitations to the tactics and strategies.

(e) Apply a concept or theory from the text that may help further understand the tactics and strategies.

The team should include qualified external references to have fully credible explanations to Part I and II. Provide a references page that includes all of the sources.

Student Learning Outcomes

1. Analyze, explain, and compare agitational and protest communication theories and their applicability to historical and modern movements.
2. Cooperate in teams to identify the formation, development, and communication tactics of agitational and protest movements.
3. Identify the problems that diverse American movements experience in different settings.
4. Plan, prepare, and present well organized, clear, and creative presentations in groups.

Categories	Compares and contrasts at least three American cultures including Latino American, African American, Asian American, Native American and European American.
Citizenship Rationale	<p>The objectives and Student Learning Outcomes of this course are written in a way to fulfill the American Cultures Global Citizenship requirement.</p> <p>The class specifically explores the ways that diverse groups utilize agitational and protest communication with desired ends. Attention will be given to diverse groups from different ethnic, gender, and/or religious backgrounds, as well as international contexts. The course was created with historical and contemporary movements in mind, including Civil Rights Movements, Black Lives Matter, the Chicana/o Movement, the Arab Spring, and others. The course compares the ways communication influences the formation, process, and effectiveness of diverse groups' protests and movements. We extend the analysis to international movements that are shaped and influenced by intersectional demands, as well as agitational and protest communication. Importantly, the course emphasizes the importance of empathetic listening to the protests, demands, and voices of diverse groups domestically and internationally.</p>

Application For Course To Fulfill SMC's Global Citizenship A.A. Degree Requirement

To fulfill the Global Citizenship requirement for a degree from Santa Monica College, students must successfully complete a minimum of 3 units from a list of courses approved with the Global Citizenship designation. These courses fall into one of the following five categories:

1) American Cultures:

An American Cultures course utilizes a comparative framework to explore how the American identity and experience have been shaped—and will continue to be shaped—by a diverse array of cultural influences and traditions. An American Cultures course compares and contrasts at least three American cultures including Latino American, African American, Asian American, Native American and European American.

2) Ecological Literacy:

Ecological literacy requires interdisciplinary understanding of both nature and humanity. This includes scientific examination of the interactions between and within the systems and cycles of the atmosphere, lithosphere, and hydrosphere, which together provide the basis for life on Earth. Ecological literacy also includes awareness and understanding of the many continuing impacts that human beings have had on natural environments, at scales ranging from the local to the global, and how those impacts are linked to the sustainability of social, cultural, and political-economic systems. Any course whose content **focuses primarily on one or more** of four areas (see below) will be considered for the Ecological Literacy category.

3) Genders and Sexualities:

A Genders and Sexualities course is substantially focused on how the constructions and varieties of genders and sexualities—as well as identities—are formed, reformed, defined, redefined and experienced in a contemporary context. In order for a course to be considered under the Gender and Sexualities category, the course content **must focus primarily on at least one of five areas (see below)**:

4) Global Studies:

A course that fulfills this area will explore the factors that have shaped our global community and provide students with an understanding of their roles in relationship to other peoples and systems on a global level. To be included in the Global Studies category a **course must meet three criteria (see below)**.

5) Service Learning:

Service learning is an instructional method that fosters civic responsibility by integrating community service with academic instruction. A course must utilize service learning as a *significant* pedagogy in reaching the course objectives and student learning outcomes as expressed on the course outline of record. In order for the pedagogy to be considered “significant”, a **course must meet four criteria (see below)**.

To submit a course for approval, please complete the following form:

Global Studies Category	Course meets all of the following three criteria: (Please Check)	
	<input checked="" type="checkbox"/>	Course content is explored primarily through a global perspective and a comparative and/or analytical framework is used. At least two societies or cultures outside the United States and their global impact are explored.
	<input checked="" type="checkbox"/>	Course material has contemporary significance. For example, a course would not only examine a period of history but the ways in which that period of history impacts the way we live in the world today.
	<input checked="" type="checkbox"/>	Course content addresses at least two interconnected systems (such as cultural, ecological, economic, political, social and technological systems).

Service Learning Category	Course meets all of the following four criteria: (Please Check)	
	<input type="checkbox"/>	The required hours of service must be at least 20 per semester.
	<input type="checkbox"/>	The academic rigor of the course must be supported by the use of service learning.
	<input type="checkbox"/>	Structured written and/or oral reflection activities must be ongoing, involve instructor feedback to students, and be structured in such a way to help achieve the course and/or assignment objectives.
<input type="checkbox"/>	The service-learning component of the course must be integrated into the grading criteria for the course such that it contributes to at least 40% of the grade. (Please note: the hours completed are NOT part of the grade, the academic work resulting from the service learning hours contribute to at least 40% of the grade.)	

Step 2: Course Outline of Record

It is expected that the particular focus of the category to which you are applying be **integrated throughout the course content, objectives**, etc. As such, the course outline of record must have been updated within the past two academic years to be considered by the committee.

Step 3: Student Learning Outcome

It is expected that **at least** one student learning outcome (SLO) of this course reflects the particular focus of the category to which you are applying. Please identify that SLO (or multiple SLOs) here:

SLO: The course sequences in Chinese and Spanish are used as examples below. Courses in levels 1-4 of all the languages on this application have analogous SLO's.

Chinese 1, SLO #4: Demonstrate an elementary knowledge of some aspects of Chinese culture that are introduced in the course. As assessed by: Student oral presentations in class.

Chinese 2, SLO #3: Demonstrate a basic knowledge of some more important aspects of Chinese culture that are introduced in the course. As assessed by: Oral presentations in class Short answers or identifications on exercises, quizzes, and/or exams.

Chinese 3, SLO #3: Demonstrate a fundamental knowledge of some more important aspects of Chinese culture that are introduced in the course. As assessed by: Oral presentations in class Short answers or identifications on exercises, quizzes, and/or exams.

Chinese 4, SLO #3: Demonstrate an extensive knowledge of all the important aspects of Chinese culture that are introduced in the course. As assessed by: in-class readings, writing substantial essays on given topics, quizzes and tests.

Spanish 1, SLO #3: The student will exhibit cultural awareness by the following: a) The student will demonstrate proper use of formal and informal address (tú, Ud., vosotros, Uds.) when given a specific social situation. b) The student will demonstrate his/her knowledge of the geography of the Hispanic world (countries, capitals and location of each Spanish speaking country). As assessed by: Participation in class dialogues (a), and map identification exercises (b).

Spanish 2, SLO #3: The student will demonstrate cultural awareness regarding the following topics: Hispanic food, music, literature, art and outstanding Hispanic persons. As assessed by: participation in class discussions and making presentations on a selected cultural topic.

Spanish 3, SLO #1: Students will demonstrate an understanding of universal cultural themes of the Spanish-speaking world by reading, summarizing, and interpreting a variety of Hispanic literary, artistic and creative works presented in the course. As assessed by: Participation in class discussions; oral presentations; written essays.

Spanish 4, SLO #1: Students will demonstrate an understanding of the Spanish language and the Hispanic cultural diversity in the global setting by expressing, discussing and defending their opinions and impressions in both written and oral expression. As assessed by: Participation in class, guided class activities, debates, surveys, formal and informal writing assignments.

Step 4: Narrative

Please write a rationale as to why this course should fulfill of the SMC Global Citizenship A.A. degree requirement for the particular category under which you have applied. Explain how this course fulfills the areas checked above.

Narrative:

These courses prepare students to interact with native speakers of the language and people from countries where the language is spoken. All language courses at SMC in levels 1, 2, 3 and 4 introduce students to the cultural, economic and social issues that impact these countries. The courses teach the ethnic, racial and religious diversity of these countries and the varied cultural contributions of their inhabitants. Students examine various cultural aspects of the countries where the language is spoken including the economic disparities between different regions and ethnic groups, the arts, environmental and ecological diversity, and family and societal structures in these countries.

Student Interactions

Student-Instructor Interaction	<p>A Welcome email blast will be sent out prior to the semester. A recorded video providing an overview of canvas and how to navigate. Each week, lecture notes with materials related to the week's topic are posted for students to complete by the end of the week. Students will submit weekly assignments which will be graded with feedback by the instructor. Students are encouraged to ask questions to both the instructor and the class related to these materials.</p> <p>Weekly exercises will be assigned to assess the students' understanding of the material. The instructor then reviews and assesses this work and provides feedback to the student. Students are encouraged to discuss these comments further with the instructor.</p> <p>The instructor will participate in the weekly discussions and will provide feedback on student assignments at least weekly.</p>
Student-Student Interaction	<p>Weekly discussion boards will provide an opportunity for students to apply course material to their lives. Students will be expected to comment on each others posts.</p>
Student-Content Interaction	<p>Students will be introduced to theoretical concepts focused on self-exploration and career research. Students will then navigate resources including; websites and career information systems. This will allow them to tailor their interests and apply the content learned.</p>

Online class activities that promote class interaction and engagement	Brief Description	Percentage of Online Course Hours
Discussion Boards	Weekly discussion boards will allow students to apply the theoretical concepts to their career exploration process. Additionally, students will	

	respond to each others posts.	
Online Lecture	Students will be introduced to concepts through methods including; Narrated Power Points, Video lectures, Content pages for pertinent information.	
Exams	Exams will evaluate student understanding of textbook, course reader material and online lecture.	
Describe how content will be organized and delivered in the interest of achieving course outcomes/objectives (e.g. what are the methods of instruction being used, technologies used, approximate time schedule, necessary instructional materials.)		
<p>The course will be divided into weekly modules. Each module will include learning objectives and an overview of weekly topics, expectations, resources and assignments. A typical module will include;</p> <ol style="list-style-type: none"> 1. An overview of the content and material, often presented in the form of a recorded video or narrated PowerPoint. 2. A self-assessment activity allowing the students to apply the content and material to their own lives. 3. Discussion board with connected weekly topics allowing students to interact with each other and gain a broader perspective of the material. 4. Quizzes to best ensure students are current with textbook reading. 5. Submit weekly written assignment based on content area being explored that week. 6. A weekly "wrap-up" content page will provide a checklist of the module expectations allowing students to best ensure they have completed their work. 		
Describe the technical qualifications an instructor would need and the support that might be necessary for this course to be delivered at a distance (e.g. the college's existing technology, CCCConfer certification, other specialized instructor training, support personnel, materials and resources, technical support, etc.)		
Instructor needs to have skills in delivering content online - both written and visual content. Ability to create online environments using Canvas.		
Describe any student support services one might want or need to integrate into the online classroom for this course (e.g. links to counseling, financial aid, bookstore, library, etc.)		
Instructor will provide a "start here" module which will detail and connect students to student services, additional support services, explain the academic code of conduct, provide an overview of Canvas with contact information for technical support, and include an overview of the academic calendar.		
Describe how the design of the course will ensure access for students with disabilities including compliance with the regulations of Section 508 of the Rehabilitation Act.		
All recorded content will include closed captioning. Syllabus and downloadable documents will be created utilizing universal design allowing easy access for screen readers and other adaptive technology.		
Using one of the course objectives, describe an online lesson/activity that might be used in the course to facilitate student learning of that objective. Be sure the sample lesson/activity includes reference to the use of online teaching tools (such as drop box or threaded discussion, or multimedia such as Articulate, Flash, Jing, etc.).		
<p>Course Objective: Students will identify personality characteristics including values and skills.</p> <p>Online Strategies:</p>		

In the absence of an on-ground classroom format, students will access and utilize Choices360.com. This website provided through SMC will allow students to complete an online values and skills sort.

At the conclusion of the activity students will be provided a "career thoughts" reflection paper allowing students to reflect on the activity and make connections to their own lives and goals.

A subsequent discussion board will allow students to share results, interact with their peers, and gain a broader perspective.

The instructor will facilitate and when appropriate engage in the discussion board.

Instructor will provide written or recorded feedback to submitted work.

Assessment Best Practices

20%-Participation in weekly Discussion Boards - Instructor will embed rubric into discussion overview allowing students to understand grading expectations and policies. Instructor will grade on a weekly basis and provide feedback either written or recorded.

40%-Written Assignments - Instructor will embed rubric into assignment overview allowing students to understand grading expectations and policies. Instructor will grade on a weekly basis and provide feedback either written or recorded.

15%-Conducting an Information Interview with a person in a career field of interest. - Instructor will embed rubric into assignment overview allowing students to understand grading expectations and policies. Instructor will grade and provide feedback either written or recorded.

25%-Final Project combining self-exploration knowledge with career research. - Instructor will embed rubric into assignment overview allowing students to understand grading expectations and policies. Instructor will grade the final and provide feedback either written or recorded.

Course Objectives	
Upon satisfactory completion of the course, students will be able to:	
1. Analyze the process for making personal financial decisions, develop personal financial goals, and calculate time value of money situations associated with personal financial decisions. Assess personal and economic factors that influence personal financial planning.	
2. Recognize relationships among financial documents and money management activities, create a system for maintaining personal financial records, develop a personal balance sheet and cash flow statement, create and implement a budget, and calculate savings needed to achieve financial goals.	
3. Describe the importance of taxes for personal financial planning, calculate taxable income and the amount owed for federal income tax, and prepare a federal income tax return.	
4. Analyze factors that affect selection and use of financial services. Calculate the cost of various payment methods, and interest earnings from savings plans.	
5. Define consumer credit and analyze its advantages and disadvantages, differentiate among various types of credit, assess his/her credit capacity and build a credit rating, analyze the major sources of consumer credit, determine the cost of credit by calculating interest using various interest formulas, develop a plan to manage personal debt, and assess the financial implications of consumer purchasing decisions.	
6. Evaluate available housing alternatives. Analyze the rent versus buy scenarios in housing by computing total renting costs and total buying costs. Determine affordability for home purchase by computing the affordable amounts for mortgage loan, monthly mortgage payment, and the home purchase price.	
7. Develop a risk management plan using property, liability, homeowner's/renter's, automobile, health and disability income, and life insurance. Calculate insurance coverage under automobile and homeowner's insurance programs. Compare different health insurance plans by calculating reimbursement amounts. Determine the needs for life insurance under different computational approaches.	
8. Explain the importance of an investment program. Apply the time value of money to calculate investment returns, and compute the impact of tax on investments. Describe how safety, risk, income, growth, and liquidity affect investment decisions, and identify the major types of investment alternatives.	
9. Recognize the importance of retirement planning, and analyze his/her current assets and liabilities for retirement. Calculate the accumulation in a retirement account using the time value of money concept. Analyze the personal aspects of estate planning, and assess the legal aspects of estate planning. Distinguish among various types of formats of wills, and calculate estate tax and gift tax.

Course Objectives	
Upon satisfactory completion of the course, students will be able to:	
1. Demonstrate increased vocabulary through knowledge of essential college level words and commonly found Greek and Latin word parts, and through the use of context clues and the dictionary	
2. Identify main ideas and supporting details to demonstrate basic reading skills.	
3. Utilize critical thinking skills, such as recognizing author's purpose, distinguishing fact from opinion, recognizing connotation, tone, and irony, developing questions of fact, inference, and speculation from specific texts.	
4. Study-read through the use of overview-skimming, self-testing, oral and written paraphrasing and/or summary writing, and note-taking or annotating and underlining techniques	
5. Use a variety of prewriting techniques and comprehension of the readings to generate and organize ideas into essays.	
6. Write a thesis statement with a specific focus, and develop a thesis statement into a full essay	
7. Read one to three full-length works (novel, book of short stories, autobiography, biography, non-fiction text) and complete a reading response journal in the form of summary and response, distinguishing what the writer says and what the reader interprets or analyzes	
8. Demonstrate an understanding of the writing process, including pre-writing, planning, drafting, revising, and editing	
9. Create topic outlines for multi-paragraph essays	
10. Demonstrate the ability to follow instructions on tests and written assignments	
11. Develop the parts of an essay, including introduction with thesis, supporting paragraphs, and conclusion	
12. Based on response to a specific reading, write multi-paragraph thesis-and-support essays on a variety of topics	
13. Write summaries that demonstrate comprehension of academic essays and articles	
14. Use correctly the basic marks of punctuation	
15. Write essays relatively free of basic mechanical errors, including comma splices, run-ons, and fragments	
16. After critical reading of an article at a secondary/post-secondary level, write an essay in 80 minutes that contains a summary, an introduction, a thesis, and several supporting paragraphs, and that is relatively free of basic grammar errors	
17. Act more confidently in their reading, writing, and study skills and their ability to apply those skills to their continued academic work.

Assignments
Sample Assignment
<ol style="list-style-type: none"> 1. Write an argumentative essay in response to a current controversy reported in the New York Times. To do that, first read and annotate the article, noting main ideas and opposing viewpoints, and differentiating facts from opinions. Create a graphic organizer of the article, according to the journalist's questions, Who? What? When? Where? Why? And How? Use the graphic organizer to help you write a thesis-driven essay that develops your central argument with evidence from the text and your own reasoning. 2. Based on an assigned reading, write three to five discussion questions based on Socratic questioning models. For each question, note the quotations or page numbers/paragraphs that prompted the question. Share your questions in class discussion. After discussion, write an evaluation of the effectiveness of the questions and note the issues and further questions that were raised. Finally, select one compelling question, refine it, and turn the question into a thesis statement that will be developed into an essay. 3. Grammar in context: In preparation for writing argument, practice writing complex sentences. <ol style="list-style-type: none"> 1. Example: Smoking has been proven to be bad, if not fatal for health. Should smoking be made illegal? 2. Pro: Because smoking has been shown to have so many negative effects on health, the sale of tobacco should be made illegal. (cause/effect) 3. Con: Although smoking has been linked to various health problems, adults should have the right to make their own decisions about whether or not to smoke. Smoking should remain legal. (argument/refutation) 4. Self-evaluation Essay: Reread the Educational Autobiography you wrote at the beginning of the term. Where are you now in terms of the things you discussed early in the term? Consider the following: <ol style="list-style-type: none"> 1. How are you doing in terms of developing mastery as an academic reader? Strengths? Areas for improvement? Are you reading differently than you did at the beginning of the term? What things have helped you to develop your mastery? 2. How are you doing in developing mastery as a critical thinker? Strengths? Areas for improvement? What has helped you develop? Are you thinking differently than you were at the beginning of the term? What has helped you to develop your skills as a critical thinker? Give specific examples, if you can. 3. How is your mastery of academic writing? What do you feel confident about now that you may not have been confident about at the beginning of the term? Are you writing differently? Strengths? Areas for improvement? 4. Describe your motivation this semester. Were the moments when your motivation dropped? If so, what was going on? When was it

highest? Why was it particularly high at that point?	
Student Learning Outcomes	
1. Using a specific reading selection, demonstrate the ability to develop an essay in an 80 minute time period, employing various prewriting techniques. Essay content will demonstrate an adequate understanding of the reading. It will display basic organizational and sentence skills, including the use of thesis statement, topic sentences, and adequate development.	
2. Read and decode multi-disciplinary college level texts, identifying rhetorical structure, distinguishing between main and supporting ideas, and recognizing facts and inferences.

PROGRAM OF STUDY

Geospatial Technology Department Certificate

Justification for
Proposal

Geospatial technology is a set of technologies used to capture, store, manipulate, analyze, manage, and present geographic information. It has a wide range of applications in government agencies, business and industry, and is an essential skill set for employment in those fields. The department certificate program will provide students in-depth understanding in geospatial technologies, including geographic information systems (GIS), remote sensing (RS), global positioning systems (GPS), and digital cartography. Students with the certificate are expected to be competitive in the related job market.

Career Opportunities

Over 80% of data used for decision-making in government, business and industry has a spatial component (i.e. geospatial data). New areas of rapid growth are in criminal justice, homeland security, marketing, retail site location, resource allocation, banking, health-care planning, disease control, insurance, real estate and disaster preparedness, management and response. Most local, state, and federal government agencies use geospatial technologies and maintain a staff of GIS technicians, Geospatial analysts and GIS professionals. Geospatial technologies are also commonly used in the private sector by businesses, planners, architects, foresters, geologists, environmental scientists, archaeologists, real estate professionals, marketers, sociologists, and bankers. The expansion of jobs using geospatial technologies is anticipated to continue for many years to come.

Program Description:

Geospatial technologies, including Geographic Information Systems (GIS), Remote Sensing (RS), Global Positioning System (GPS) and Digital Cartography, are used to capture, store, manage, analyze and visualize geospatial information related to locations on Earth's surface. We use those technologies to combine various types of geospatial information in a digital environment to answer the questions "what is there?" and "why is it there?". Geospatial technologies have been widely used in our daily life, government agencies, as well as organizations in almost every industry. There is a growing interest and awareness of the economic and strategic values of geospatial technologies.

The primary goal of the program is to ensure that students become sufficiently grounded in the theoretical underpinnings of geospatial technologies and gain the skills needed to construct high-quality applications. Geospatial technologies covered include spatial data capture and management using RS, GPS and GIS, spatial analysis and modeling using GIS, as well as map making using digital cartographic technologies.

DEPARTMENT CERTIFICATE REQUIREMENTS:

- satisfactory completion of the Area of Emphasis

- a grade of C or higher in each course in the Area of Emphasis
- completion of at least 50% of Area of Emphasis units at SMC

Note: Department Certificates are not notated on student transcripts. Student must submit a petition to the relevant academic department.

Additional information for the Certificate is available at the Transfer/Counseling Center and at www.smc.edu/articulation.

CATALOG RIGHTS: A student may satisfy the requirements of a Department Certificate that were in effect at any time of the student's continuous enrollment. Continuous enrollment is defined as enrollment in consecutive Fall and Spring semesters until completion.

Program Learning Outcomes:

Upon completion of the program, students will apply cartographic principles of scale, resolution, projection, and data management to solve a geographic problem using geospatial technologies.

Upon completion of the program, students will demonstrate proficiency in spatial data collection and manipulation, spatial data management, spatial analysis and spatial modeling using geospatial technologies.

Upon completion of the program, students will execute an original GIS project under the supervision of a faculty or professional mentor and demonstrate the ability to communicate project outcomes orally, in writing and graphically.

Area of Emphasis

Required courses	Units
GEOG 20 (<i>same as</i> Introduction To Geographic Information Systems <i>GIS 20</i>)	3
GEOG 23 (<i>same as</i> Intermediate Geographic Information Systems <i>GIS 23</i>)	3
GEOG 25 (<i>same as</i> Introduction to Cartography <i>GIS 25</i>)	3
GEOG 26 (<i>same as</i> Introduction to Remote Sensing <i>GIS 26</i>)	3
GIS 27 Applications in GIS	3
Total Units for Area of Emphasis:	15

ADDITIONAL INFORMATION:

The program covers the fundamentals of geospatial technologies and its applications. Through hands-on exercises and projects, students will acquire working experience with mainstream GIS and Remote Sensing software packages such as ArcGIS and ENVI. By providing both theoretical knowledge and hands-on experience, the program differs from a typical short course designed for learning a specific software package.

PROGRAM OF STUDY

Legal Office Clerk

Certificate of Achievement

Justification for Proposal

As part of the 'Doing What Matters' initiative, skills-builder students are experienced workers who take a limited number of community college courses to maintain and expand skill-sets required for ongoing employment and career advancement. Although numerous research studies have shown that skills-builder students secure significant earnings gains, they are not currently included in state accountability metrics. Many practitioners are now calling for skills-builder outcomes to be factored into statewide measures and goals. For example, recognizing skills-builder outcomes was a recurring theme in regional meetings held in early 2015 to inform the Board of Governor's Task Force on Workforce, Job Creation, and a Strong Economy. Short-Term Skill Certificates provide basic training for (1) entry-level positions or a specific skill set needed for a particular industry and (2) offer a pathway to a higher certificate or degree.
