Subject: CIP Schedule

Hi John, hope all is well.

It's that time again to review the Construction projects and submit the worksheets to the auditors for the 24-25FY.

See the attached. Nothing new; it's all what you have been doing in the past. You can see your last year's and follow that.

The worksheet has multiple tabs. Please review them.

Is there any additional land purchases? Any deletions (sell)?

Also, the CIP, please fill the columns SU/VW based on the projects' statuses.  
For Del Site tab, any demolitions, deletions of the buildings?

Thank you, Larisa

Subject: Fixed Asset Worksheet

Hi Nyla,  
See the attached worksheet. I only found one error related to the PO which was supposed to be PO2W vs 3W. See the notes.  
Also, added 2 items related to Auxiliary Services for their tag numbers.  
  
If for any reason, you can't find the items based on the PO numbers I have provided, would you please give me the correct PO's related to those items?  
  
Thank you, Larisa

Hi Larisa,

Attached is the completed information per your request. Please note, the items highlighted in yellow are items that was purchased through Auxiliary/Foundation or do not meet the requirement of being a tangible items that can be tagged. Also I have added a secondary tab for Retired Asset that have been retired at the capitalized value. At this time I have not received any scrap value for these items.

Please let me know if you need any additional information.

Thanks,

**Nyla,**

Hi Larisa,  
I would like you to review the attached XREQ and let me know whether what I did made sense to you.  
The program purchased 7 cameras, 1 controller, and other connections and cables. They also have installation services.  
Please let me know if you are ok with it, or if you have a better idea.  
Thank you.

Subject: RE: 26\*2602

Hi Ann,

My opinion on this one is to capitalize everything as a 6410 since it seems to be one system even if installed in different classrooms. All cameras are controlled by one central controller and integrated into an existing Tricaster system.  
The scope of the work explicitly states furnish, install, and integrate. Also references the integrations on the bullet points; so, it's a system that's being configured as one functioning unit.

Thank you, Larisa

Hi Larisa,  
If that is the approach, it will be much easier because we can put all the lines under 6410 and consider it as 1 unit.

Raj,

Do you think you can tell Ruth?

Hi Larisa,

I hope you are doing well!

I wanted to see if you could please help me with this requisition. The Library will be doing some renovations, so they are ordering lots of booths, lounge areas, and chairs. I am struggling to decide if these items should be 6450 or 6410.

1. The image below shows some lounge/booths. They are ordering some with the cubby to the right and others to the left at \$2,409.35 per unit. But they are also ordering side and back panels which will be added to these lounge/booths. If everything went together to form this booth, then I think this could be 6410. Do you agree 6410 or do you think each piece is independent since they can be moved/removed 6450?

| Item    | Description                                                                                                                                                                                                                                                                                               | Unit    | Price | Quantity   | Total       |

Hi Jason,  
6410 is for unit cost above \$10,000. If the shipping is related to the item, then it should be capitalized. If other components are related to the main item, they also are capitalized.  
Thank you, Larisa

Hi Ann and Larisa, Please find our answer to this question? Can you read my comments in red below. I am trying to help an admin assistant for the BML Grant for a purchase requisition of

Hi Ann and Larisa, please lend your expertise to this question. When you read my comments in red below, I am trying to help an admin assistant for the HRM want for a purchase requisition or equipments that presumably has useful life greater than 1 yr. Is it ok to code entire shipping fees to object code 6410 because I am assuming it is ok to capitalize shipping cost (sometimes, in other past invoices,..., the installation charges and warranty costs, too) into the fixed asset as complete cost to get asset ready for service; and I am choosing the object code 6410 because it is highest dollar value? Please advise if I should approach it differently?

Regards,  
Jason

Hi Larisa, let me know if you have minute for a quick call today to touch bases on this and if you prefer Teams/Zoom. Some of the lines could be interpreted one way or another.

Thank you,

Matthew Kiaman, MSIS  
Director, Network Services

Subject: SHI International

Hi Matthew, hope all is well.

As the FY approaches to the end, I am reviewing the District's fixed assets and have a question about the attached purchase (Video Camera Servers).

The accounting definition for the capitalized asset is "all costs necessary to bring the asset for its intended use" and the monetary threshold is \$5,000 and above for the current year.

For example, if we purchase a printer, even the first cartridge will be coded as part of the cost to test if the printer is working. The additional cartridges, then will be coded as supplies. Also, we code software license and extended maintenance contracts/warranties separately.

Which lines on the PO if there are any that should be combined with the Line #1: Catalyst 9300X? Currently, all are split into different object codes.

I was thinking that Line 1, 4, 5, 6, and 7 go together (and was invoiced together) as 6410 items. However, not sure and wanted to ask you.

Thank you, Larisa

Subject: MCM Integrated Systems-JVA 26\*447

Hi Jessica and Ann,

Few questions/clarifications related to this item.

There was a journal for manual accrual in 24-25FY: JVA 26\*338. The invoice indicates a 7/3/25 date and the associated PO2W 25\*1374 shows to be rolled to 2026.

1. Do you know (or can you find out) when was the work done? Is it in 24-25FY or 25-26FY? Is the accrual appropriate or it should be part of the new FY?
2. How come you decided to reclassify from the 6410 to 5890?

Thank you, Larisa

Subject: RE: MCM Integrated Systems-JVA 26\*447

Hi Larisa,

1. I am going to email John Greenlee to ask when the work was done. I'll get back to you.
2. I decided to reclassify the accrual because the prevailing labor charge was so high that it would change the equipment coding. I figured there would be an issue with 6410 since the equipment is not \$5,000 per unit. It felt better to **code** the labor as 5890 and the actual equipment item as 6450.

Thank you,

Hi Jessica,  
In this case, if Larisa wants you to reverse the reclassification back to 6410, please do so.

Hi Larisa,

Per John, this was completed June 10<sup>th</sup>. If you prefer **object code** 6410, I can reverse my entry and put the accrual back to 6410.

Thank you,

Hi Jessica,  
Thanks for the quick follow up with John. As I have always mentioned, SMC doesn't have policies on this topic. I have been applying my knowledge and struggling often times in many complex situations. See below that I follow on the top of knowledge from other sources (GAAP). In this case, combined, it meets the threshold. Let's keep it under 6410.

5890 is used for if there's an existing contract between SMC and the vendor.

Ann,  
We are open to your suggestions.  
I attached the backup for an easy lookup.

Thank you, Larisa

#### Capitalization Threshold

The capitalization threshold is the **per-unit cost** at which a given item qualifies for capitalization. The **cost used for determining capitalization should include tax, freight charges, and installation costs, whether included in the invoice cost of the item or paid separately**. Capitalization thresholds may differ from one LEA to another depending on materiality. Typically, the larger the LEA, the higher is its capitalization threshold.

For most LEAs, a capitalization threshold of at least \$5,000 is recommended. For larger LEAs, a higher capitalization threshold is appropriate.

The uniform guidance for administration of federal grants in Title 2 of the **Code of Federal Regulations**, Part 200 (the Uniform Guidance) allows property costing up to \$5,000 to be charged to federal grants as supplies, rather than as equipment, unless the LEA's capitalization threshold is lower. If an LEA elects to set a capitalization threshold higher than \$5,000 for most items, it still needs to have a separate threshold of \$5,000 for items paid for with federal funds. It is recommended that LEAs set a similar threshold for items paid for with restricted state funds.

Dear Larisa,  
I am sorry for overlooking it. You are right. We should **code** this to 6140.  
Thank you for catching it.

Thanks, Larisa. Yes, we're fortunate that we still have our house.

How about next Friday at 10:30 pm?

Let me know if that works or if another time will be better.

Thanks,

Katie

**FY 11-12 Change in Estimated life of Building Improvements from 50 to 20 years**

- a. Estimated life for building improvements was changed from 50 to 20 years.
- b. For acquisitions before FY 11-12, new depreciation is calculated by dividing the book value at 7/1/2011 by the new remaining life (20 years - # of years depreciated)
- c. If an asset has been depreciated for more than 20 years, the book value at 7/1/2011 are treated as depreciation expense for FY 11-12
- d. Building improvements were not depreciated based on the remaining life for the building as improvement is supposed to increase the usability of the building.

**FY 12-13**

Added capitalized interest per GASB 62 - interest on the bond issuance allocated among the assets the bond proceeds was used for.  
Projects that were completed in previous years were shown as adjustments in both assets and CIP.  
Depreciation on the adjustments prior to FY 12-13 are shown as adjustment to accumulated depreciation.  
Depreciation on building changed from remaining life (50 less age of building to 50 years from date of purchase.

**FY 13-14**

CIP are considered completed before upon closure with DSA - changed to date approved by BOT as completed and put into use.

**FY 14-15**

Interest not capitalized
