Class Scheduling**

**About 25% of Student Credit Hours
Are Provided By Ways That Eliminate
All Vehicle Trips**

- **Public Transit**
- **Online Education**
- **Rideshare**
- **Bicycling**
- **Walking**

Recommended Substitute Proposal

1. From August 20, 2005, to August 19, 2006, Santa Monica College shall have vehicle and pedestrian access from its Bundy Campus directly to Airport Avenue on the following conditions:

a. The College shall pay for all roadway improvements necessary to provide access. During construction of roadway improvements, access shall be provided through one of the gates used by BAE Systems.

b. The College shall pay \$1,000,000 to the City as the College's mitigation share for planned improvements along Airport Avenue.

c. The City shall restrict left turns onto Airport from vehicles exiting the Bundy Campus during such hours of SMC use as the City deems appropriate. Public transportation vehicles shall be exempt from such restrictions. SMC shall monitor and enforce such left turn restrictions.

d. The College shall relocate its existing Airport shuttle in time so as to not delay the start of construction of the Airport Park.

2. The City and College shall continue to meet to discuss cooperative measures to reduce traffic from College operations.

3. Upon adoption by the Board of Trustees of the master plan for the Bundy Campus, the College and City shall meet to discuss an extension of the access agreement.
